ANNOUNCEMENT

Drilling and blasting play a pivotal role in surface and underground excavation, serving as the foundational processes in mining, construction, and quarrying operations worldwide. These techniques are essential for breaking hard rock formations efficiently and safely, enabling access to valuable minerals, constructing tunnels, and creating foundations for infrastructure projects. Understanding the principles of drilling and blasting is crucial for optimizing excavation processes, ensuring worker safety, and minimizing environmental impact. To deliberate on the emerging issues related to the subject TAI in association with CBIP, ISRM and National Skill Development Forum (IEI - H.P. Chapter) announces a Conference on “Technological Advancement in Drilling and Blasting for Tunnelling Projects” on 27 - 28 June, 2024 (Thursday-Friday) at National Skill Development Forum, The Institution of Engineers (India), Engineers Bhawan, Nigam Vihar Shimla -171002 (HP).

ABOUT THE ORGANISER (TAI)

Tunnelling Association of India (TAI) is the Indian chapter of the International Tunnelling and Underground Space Association (ITA) established in 1991, has been involved in dissemination of information about the latest technological development in the execution of tunnel and underground projects by encouraging planning of the use of subsurface and to promote advances in the preparatory investigations for tunnels, design, construction and maintenance of tunnels and also by organizing symposia, seminars, workshops, and training courses, both at national as well as international level, in liaison with international organizations.

OBJECTIVES

The objective of this Conference is to share experiences and update the knowledge of tunneling professionals, i.e., Engineers, Geologists and tunnel technician to understand various issues & challenges being faced during investigations, design, construction and how they can be overcome.

TOPICS

The Conference shall cover but not limited to the following sub-topics contributes to a comprehensive understanding of Technological Advancement in Drilling and Blasting for Tunnelling Projects:

- Drilling methods
- Explosive selection and handling
- Blast design principles
- Safety protocols
- Environmental considerations
- Technological advancements
- Case Studies

WHO SHOULD ATTEND

The Conference programme is designed for professionals working in public or private sector organizations dealing with the design and construction of tunnel and underground works. The Conference is of interest to tunnel designer and operators, construction and project managers, engineers (both field and design office), construction supervisory personnel, construction cost estimators, geotechnical engineers and individuals in the construction industry wanting a better grounding in modern tunnelling techniques and practices, geologists, regulatory bodies. Government Departments, Tunnel Building Contractors & Consultants. Suppliers of Products & Services for Tunnelling Construction. Fire Authorities dealing with Infrastructure Tunnels, Technical and Research Institutes, Universities dealing with Tunnelling. Organization & associations active in the Tunnelling World and Funding Agencies.

PRESENTATION BY EXPERTS

Eminent experts on the subject are being invited to deliver experts lectures during the Conference. However experts who desire to make presentations on the above subject are requested to furnish the write-ups to reach CBIP office latest by 15th June 2024.

OFFICIAL LANGUAGE

The official language of the Conference will be English.
