ANNOUNCEMENT

Tunnel construction activity in India has seen significant growth in the past few years, owing to the growing urbanization and development across key infrastructure sectors. The growth has primarily been driven by a robust pipeline of projects as well as investments in developing hydropower projects, enhancing urban mass transit networks, augmenting road and rail interconnectivity, constructing underground crude oil repositories, and upgrading water supply and sewerage systems. The development of safe tunnels necessitates the consideration of a diverse array of factors. Every aspect, ranging from the tunnel design, ventilation system and lighting to firefighting procedures, plays a crucial role in ensuring safety of workers as well as travellers. To deliberate on the emerging issues related to the subject TAI in association with CBIP announces a Conference on **Safe & Sustainable Tunnelling** on 4th December 2024 (World Tunnel Day).

ABOUT THE ORGANISER (TAI)

Tunneling Association of India (TAI) is the Indian chapter of the International Tunneling and Underground Space Association (ITA) established in 1991, has been involved in dissemination of information about the latest technological development in the execution of tunnel and underground projects by encouraging planning of the use of subsurface and to promote advances in the preparatory investigations for tunnels, design, construction and maintenance of tunnels and also by organizing symposia, seminars, workshops, and training courses, both at national as well as international level, in liaison with international organizations.
